The rediscovery of the craft cocktail is in full swing. As a tribute to this movement Barprofessional presents a series of high quality tools with the title 'The Premium Speakeasy Collection'.

A reference to the illegal bars from the 1920s of the 20th century during prohibition in the US, and the emergence of the classic cocktail recipes from that period. Superior materials combined with timeless design and functionality.

Designed for the professional and demanding bartender who understands his trade.

PROFESSIONAL PRESENTATION

The packaging of our products is very suitable for a good presentation in a shopping environment. Whether you are in the cash & carry wholesale business, a liquor store or a wine shop. Our products are available in the most optimal packaging. Our cards with eurolock ensure a well-organized and professional shelf presentation, which will boost your sales.

We provide all the items with a barcode and can also print the back with a text if desired. The products are standard packed in foil. As an additional advantage, this means that all items are packed hygienically and free from dust or scratches. Quite important for items that come into contact with foodstuffs.
